EDUCATION

Jain University, Bangalore **2022 – 2024**
Master of Computer Applications (MCA) – Artificial Intelligence, GPA: 9.37
S.N.D.T Women's University, Mumbai **2019 – 2022**
Bachelor of Computer Applications (BCA), GPA: 9.01

EXPERIENCE

Data Engineer: AR Learning **Jan 2025 – Jan 2026**

- Designed and developed scalable ETL pipelines using Azure Data Factory and Databricks for real-world datasets.
- Implemented data transformation workflows using PySpark to clean, process, and structure large datasets.
- Built and managed Lakehouse architecture using Delta Lake with Bronze, Silver, and Gold layers.
- Automated data ingestion and processing pipelines, improving efficiency and reducing manual effort.

AI & Cloud Intern: IBM SkillBuild Edunet Foundation (AICTE) **Feb 2024 – March 2024**

- Built and evaluated machine learning classification models using Python and Scikit-learn on structured datasets.
- Implemented projects including Iris Flower Classification, Breast Cancer Classification, Handwritten Digit Recognition and Cat–Dog Image Classification.
- Executed data preprocessing, feature selection and model training workflows.
- Evaluated model performance using standard ML metrics.

SKILLS

- Python
- Pandas
- NumPy
- Microsoft Excel
- SQL
- Power BI
- Data Visualization
- Microsoft Azure
- PySpark
- Model Evaluation
- Machine Learning
- Java

PROJECTS

End-to-End Netflix Data Pipeline **Aug 2024 – Sep 2024**

- Designed and implemented automated ETL pipelines to ingest, transform and store large-scale datasets in Azure.
- Performed SQL-based exploratory analysis to identify content performance trends and user engagement patterns.
- Optimized pipeline execution, reducing end-to-end processing time by 40%.
- Enabled downstream analytics dashboards and machine learning workflows.

Azure Databricks Lakehouse Architecture **Jun 2024 – Jul 2024**

- Architected a Lakehouse solution using the Medallion (Bronze–Silver–Gold) architecture.
- Implemented incremental data loading, schema evolution and ACID transactions using Delta Lake.
- Improved data quality, lineage and reliability across analytics layers.
- Optimized query performance, improving analytics efficiency by 35%.

Movie Recommendation System **Feb 2024 – May 2024**

- Developed a content-based recommendation system using KNN algorithms.
- Preprocessed user and content datasets and engineered features to improve model performance.
- Evaluated model performance, achieving 93% prediction accuracy.
- Analyzed user behavior to enhance personalization and recommendation relevance.

CERTIFICATES

- Artificial Intelligence Fundamentals by IBM 2022
- Building AI Solutions using Advanced Algorithms and Open-Source Frameworks by IBM 2022
- Data Analytics & Visualization Job Simulation by Accenture 2022
- Data Visualization: Empowering Business with Effective Insights by TATA 2022
- Python Programming Course by Scaler 2023
- Excel Skills Virtual Experience by JPMorgan Chase & Co. 2023
